## Nails - Artificial Nail Extensions

### Sculptured Acrylic Nails **Full Set £28.00**

Using a liquid and powder solution, this coating is strong and durable especially suitable for nail biters.

### Pink & White Silk Wrap Nails **Full Set £30.00**

A fine silk mesh is used to wrap either natural nails or a plastic extension tip. The silk is then sealed with a thick gel and then buffed and shined to a high gloss finish.

### Gel Nails **Full Set £26.00**

This is the most water resistant method using a UV light to bond the gel, giving the nail a highly glossed natural looking finish.

### Maintenance/Infills **£21.00**

Within 3 weeks of the initial treatment. With either Acrylic, Silk or Gel nail extensions maintenance is required. This is due to the natural nails growing and leaving gaps between the cuticle and the product. If left unattended, the product may lift, causing breakage or allowing moisture under the nail. The product is applied to the new growth area, re-shaped and buffed to a shine.

### Single Nail Repair (whole nail or overlay) **£3.00**

## Air Brush Nail Art

"That swift smudge of polish simply won't do anymore. It's now de Riquer to have your hands and toe nails adorned with mini works of art."

Airbrush nail art is really popular in America and right now Sheffield is just catching on. We at Illuzionz can transform your hands and toes with hundreds of different designs. This intricate effect is achieved with a tiny airbrush. Tiny gemstones can be added to the designs.

A deep flawless tan can be achieved in just 10 minutes, developing in 5 hours and lasting for at least a week. Sudo Airbrush tan is enriched with aloe vera, it won't turn orange or drip and is proven to be more effective than conventional 'spray booths'. Your own skin tone will determine the depth of the tan. Once developed you will achieve a golden glow. For a darker shade a second and third application on consecutive days can be made.

## Semi Permanent Make Up

Semi permanent make up is a major breakthrough of the 90's, where small amounts of inorganic pigments are placed in a dermal layer of the skin to give you beautifully shaped brows, fuller looking lips and eyes with definition! It is make up that can last for years, enhancing your natural beauty.

Frame your face with perfect looking eye brows. If your brows are too thin, sparse through over tweezing, the wrong shape, too fair or non-existent, semi permanent make up will enhance your brows forming perfect shape and colour that can look as natural or dramatic as you wish.

Add fullness to your lips. Have fuller, more sensuous lips. Semi permanent lipline/lip colour will create colour and fullness that will last all day, every day.

Eyes with definition. A soft natural line between your lashes will add definition to the shape and colour of your eyes, making lashes appear thicker. A more 'made up' appearance can be achieved depending on personal preference.

The state of the art make up will eliminate the chore you have of applying make up every day whilst enhancing your natural features.

Who would benefit? Career women, alopecia sufferers, people with vision problems, sports people, models, people who are allergic to conventional make up, correction to facial features, in fact, anyone who wants to improve the way they look.

Is it expensive? Considering the long term cost spent on cosmetics, the specialised treatment provided, reliable aftersales service, time saved applying make up, not to mention the confidence you gain knowing you look good every day and of course the greatest holiday essential ever! A typical quote heard over and over again "The best money I have spent".

Please note - the shape of the lips and brows is drawn in colour and approved by you before application. The strictest hygiene standards are followed using sealed sterilised equipment for each customer.

## Tinting

Eyelash and eye brow tinting enhances and defines your brow and lashes and does away with the need for mascara and eyebrow pencils. This semi permanent treatment lasts for 6 to 8 weeks. Clients who have not had tinting treatment before or a treatment in the last 6 months will need to have an allergy patch test carried out at least 24 hours prior to their appointment.

## Threading

Threading is an ancient method of hair removal which originated in China and is still used in many countries in the Middle East as well as India and Pakistan. It is used to give clean lines and good shape to the eye brows and also remove hair from the upper lip. 100% cotton is twisted and rolled along the surface of the skin entwining the hair in the thread which is then lifted out from the follicle. The results last anywhere between 2 and 4 weeks.

## Slimming & Toning

### Say Goodbye to Cosmetic Surgery with Genie Complete, The Ultimate Slimming & Toning System

- Treatments take from only 10 minutes
- Guaranteed results
- Instant inch loss even after your first 20 minute session
- Bust and buttock lifting
- Effective cellulite reduction

The most powerful non-surgical face lift machine on the market today. This is thanks to the 10 minute face lift technology of Mediwave, built in to an equally as powerful body contouring system. The unique body hub has 24 separate computerised outlets and 11 different wave shapes that enable the machine to perform multiple treatments for the face and body. These are specific pre-programmed modes for the following body treatments:

#### Slimtone Module

This provides slimming, toning and cellulite programmes for the body. Results are immediate and can be intensified depending on the level of your workout just like conventional exercise.

#### Lymph Module

The lymphatic drainage module has been specifically designed to increase the lymphatic flow of the body. The treatment will control the muscles, which stimulate the flow of lymph fluid. The results are rapid inch loss, detoxing of the lymph.

#### Take Ten Module

Dr Ronald Baxendale developed the non-surgical face lift function of Genie currently known as the 10 minute face lift. He developed a safe waveform up to one thousand times stronger than anything else available on the market. Because of the strength of the waveform treatment times are only 10 minutes and results are visible after the first session. Each body session takes only 20 minutes in comparison to other machines which can take up to 1 hour per treatment. It is the only system on the market that actually rebuilds facial muscle mass thanks to the Mediwave Technology that is unique to the Genie system. Genie is known as a personal trainer for the face and body.

#### Biotech Face & Body

By utilising a unique combination of specific waveforms and frequencies that work in harmony with the body's own bio-electrical impulses and signals that have been medically documented to stimulate muscle tone and enhance skin tissue. Known as microcurrents, these encourage an increase in the body's natural ability to increase protein supply and in particular collagen and elastin. Biotech can also be used on the body to assist in the treatment of cellulite, loose skin, stretch marks and even bust lifting.

## ThermaCell RF

Radio Frequency (RF) is the most effective treatment for those sagging areas which produces long lasting and dramatic results to face, eyes, arms, legs, thighs, stomach and even buttocks!

Radio Frequency (RF) is proven to work for 90% of all females and males across the UK and has a very affordable range of treatments such as:

- Non-surgical face lifts
- Skin tightening
- Body reshaping
- Collagen stimulation
- Cellulite reduction / removal

During your treatment you can expect a warm sensation under the skin, which is the Radio Frequency at work. With other systems you tend to feel a severe discomfort during the whole treatment, the system which we use has been specifically designed with the customer's comfort in mind.

Radio Frequency unlike its counterparts can treat almost anyone, like all cosmetic treatments there are spectrums of people who cannot receive treatments such as; people with a pacemaker or internal cardiac defibrillator, women who are pregnant or breast feeding and people who have metal plates joints or pins fitted.

Apart from your new found confidence after treatment the only side effect may be a slight reddening of the skin (similar to when you blush) that will soon disappear.

Each treatment is usually 15 - 30 minutes, but each individual client will receive an estimated time and cost on consultation.

While pain is a tolerance of the individual, Radio Frequency (RF) tends to be pain free, the most you should feel is a warm sensation under the skin.
